MAIL DATE		DELIVERY MODE		
11/07/2008		PAPER		

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>
	10/581,097	JANSEN ET AL.
	<b>Examiner</b> Greg Binda	<b>Art Unit</b> 3679

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If no period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) Responsive to communication(s) filed on 15 September 2008.
- 2a) This action is FINAL.      2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) Claim(s) 1-22 is/are pending in the application.
  - 4a) Of the above claim(s) 1-11 is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 12-22 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on 31 May 2006 is/are: a) accepted or b) objected to by the Examiner.
 

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
  - a) All    b) Some \* c) None of:
    1. Certified copies of the priority documents have been received.
    2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
    3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) Notice of References Cited (PTO-892)
- 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) Information Disclosure Statement(s) (PTO/GS/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- 4) Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_\_
- 5) Notice of Informal Patent Application
- 6) Other: \_\_\_\_\_

*Election/Restrictions*

1. Applicant's election without traverse of the decoupler assembly shown in Figs. 2-10 (Species I) in the reply filed on September 15, 2008 is acknowledged.
  
2. Claims 1-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on September 15, 2008.

*Priority*

3. If applicant desires to claim the benefit of a prior-filed application under 35 U.S.C. 119(e), a specific reference to the prior-filed application in compliance with 37 CFR 1.78(a) must be included in the first sentence(s) of the specification following the title or in an application data sheet. For benefit claims under 35 U.S.C. 120, 121 or 365(c), the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of the applications.

If the instant application is a utility or plant application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the specific reference must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a utility or plant application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the specific reference must be submitted during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months

from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A benefit claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed benefit claim under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

If the reference to the prior application was previously submitted within the time period set forth in 37 CFR 1.78(a), but not in the first sentence(s) of the specification or an application data sheet (ADS) as required by 37 CFR 1.78(a) (e.g., if the reference was submitted in an oath or declaration or the application transmittal letter), and the information concerning the benefit claim was recognized by the Office as shown by its inclusion on the first filing receipt, the petition under 37 CFR 1.78(a) and the surcharge under 37 CFR 1.17(t) are not required. Applicant is still required to submit the reference in compliance with 37 CFR 1.78(a) by filing an amendment to the first sentence(s) of the specification or an ADS. See MPEP §§ 201.11 and 1893.03(c).

*Information Disclosure Statement*

4. The listing of references in the specification as at page 2, lines 8 & 9, is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

*Drawings*

5. The drawings are objected to because:

- a. In Fig. 1 the rightmost numeral 15 is drawn without a lead line.
- b. In Fig. 3 the lead line for reference numeral 34 fails to indicate a reduced diameter end of the hub 22.
- c. Fig. 2 fails to show a helical slot 86 formed in the second side 78 of the carrier 75 and thus contradicts the description at page 7, lines 10+.
- d. Fig. 9 fails to show anti-ramp boss 77 engaging the second side 47 as described at page 9, line 1.
- e. Fig. 10 fails to show anti-ramp boss 77 engaging the first side 45 as described at page 9, lines 4-7 and page 10, lines 15+.
- f. The drawings fail show the limitations of claim 14.

6. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

*Claim Rejections - 35 USC § 112*

7. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

8. Claims 12-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in

the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

- a. Claim 12, line 7 recites the limitation, “a carrier mounted about said second side end of said hub”. However, the specification teaches the carrier 75 being fixedly mounted on the first end 24 of the hub 22, not the second end 26. See for example Fig. 3.
- b. Claim 12, line 9 recites the limitation, “[the carrier including] an anti-ramp slot”. However, the specification teaches the carrier 75 is provided with an anti-ramp boss 77, not a slot.
- c. Claim 12, line 13 recites the limitation, “a thrust plate fixedly mounted on said second end of said hub” However, the specification teaches the thrust plate 39 being fixedly mounted on the first end 24 of the hub 22, not the second end 26. See for example Fig. 3.
- d. Claim 12, line 13 recites the limitation, “a thrust plate . . . having a tab”. However, the specification teaches the thrust plate 39 having a slot 43, not a tab.
- e. Claim 12, lines 14 & 15 recites the limitation, “said tab traveling . . . between said first and second ends [of said hub]”. No such tab is taught or contemplated in the specification.
- f. Claim 12, line last recites the thrust plate as “preventing rotational movement of said torsion spring relative to said hub and carrier”. There is no explanation in the specification of how the thrust plate provides such a capability.

*Claim Rejections - 35 USC § 102*

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. Claims 12 & 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Lowery, US 3,844,390. Figs. 1-5 show a decoupler assembly for transferring torque between a drive shaft and an endless drive element of an automotive engine, said decoupler assembly comprising:

a hub 14 configured to be fixedly secured to the shaft 32, said hub extending axially between first and second ends;

a pulley 12 rotatably mounted on said hub and adapted to be drivingly engaged with the endless drive element;

a carrier 18 mounted about said second end of said hub and operatively coupled between said hub and said pulley for selective rotation therewith, said carrier including first and second sides and an anti-ramp up slot 42 formed in one of said sides extending first and second ends;

a torsion spring 16 extending between said hub and said carrier for transferring torque therebetween; and

a thrust plate 36 fixedly mounted on said second end of said hub and having a tab 40 projecting therefrom; said tab traveling within said anti-ramp up slot between said first and second ends for limiting rotation between said carrier and said thrust plate while preventing rotational movement of said torsion spring relative to said hub and carrier.

11. Claims 12 & 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Malion et al, US 3,837,450. Figs. 1 & 2 show a decoupler assembly for transferring torque between a drive shaft and an endless drive element of an automotive engine, said decoupler assembly comprising:

    a hub 12 configured to be fixedly secured to the shaft 21, said hub extending axially between first and second ends;

    a pulley 20 rotatably mounted on said hub and adapted to be drivingly engaged with the endless drive element;

    a carrier 14 mounted about said second end of said hub and operatively coupled between said hub and said pulley for selective rotation therewith, said carrier including first and second sides and an anti-ramp up boss 41 projecting from one of said sides;

    a torsion spring 13 extending between said hub and said carrier for transferring torque therebetween; and

    a thrust plate 30 fixedly mounted on said second end of said hub and having a slot 40 formed therein extending between first and second ends for receiving said anti-ramp up boss; said anti-ramp up boss traveling within said slot between said first and second ends for limiting rotation between said carrier and said thrust plate while selectively preventing rotational movement of said torsion spring relative to said hub and carrier.

*Conclusion*

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Greg Binda whose telephone number is (571) 272-7077. The examiner can normally be reached on M-F 9:30 am to 7:00 pm with alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on (571) 272-7087. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

/Greg Binda/
